UI / UX CONCEPT · OCTOBER 2026

Verified Africa.

Secure, trusted social-dating for Africa. 18+.

THE PREMISE

Every account activates only after phone and government-ID verification.
Real people. Real conversations. Protected by design.

02 · FOUNDATION

Design principles & visual system.

01
Trustworthy
Verified badges, clear language, zero dark patterns.

02
Modern
Rounded forms, generous spacing, confident typography.

03
Warm
Human palette, coral accents, friendly micro-copy.

04
Affordable Premium
Elevated feel without pricing exclusion.

Palette

Indigo
#0E1A3A

Coral
#FF6A4D

Surface
#FFFFFF

Neutral
#F1ECE4

Type

Display · Sora 56/Bold

Heading · Sora 24/Bold

Body · DM Sans 16/Regular. Readable on indigo at AA.

CAPTION · DM SANS 12 · UPPERCASE · +14 TRACK

₵ Coin icon

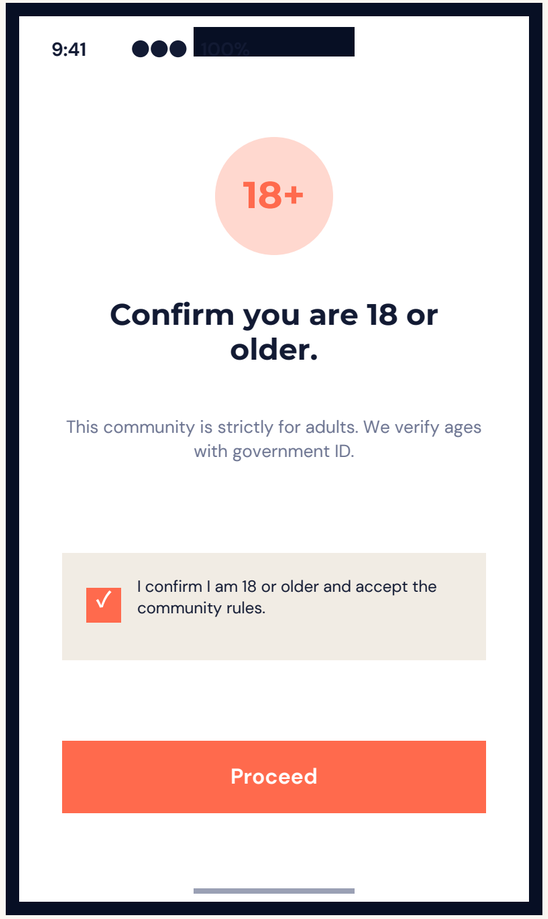

Accessibility — all pairings pass WCAG AA. Spacing scale: 4 / 8 / 12 / 16 / 24 / 32 / 48. Components reused verbatim across every screen for predictable interaction.

03 · ENTRY

Splash, welcome, and 18+ gate.

ONBOARDING FLOW

Three screens, zero friction. Trust signals appear immediately; age gating is explicit and compliance-ready.

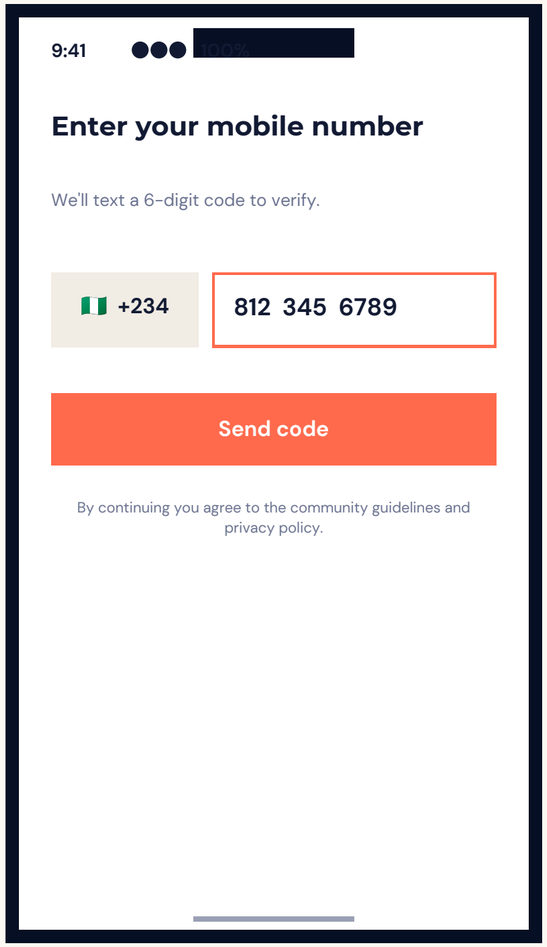

04 · AUTHENTICATE

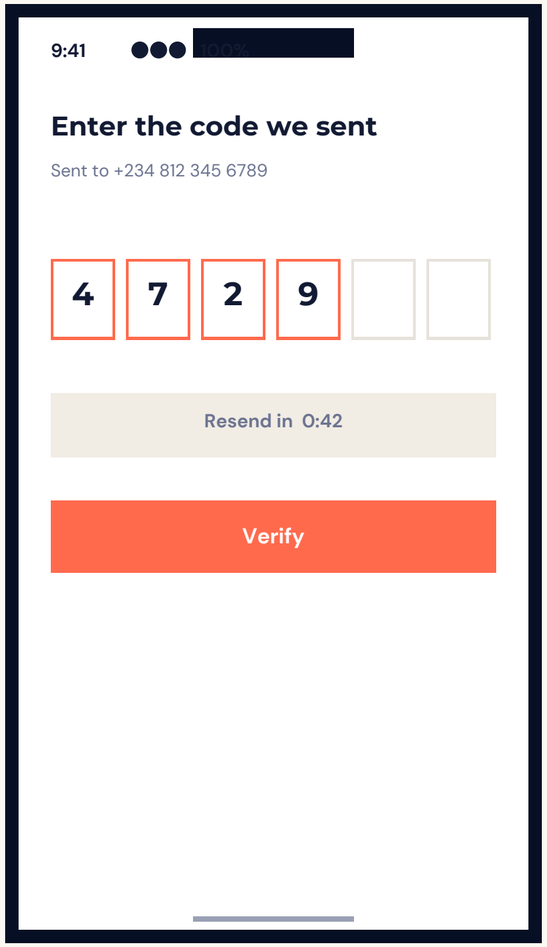

Phone verification.

Verifying a real number keeps the community real.

We default to a Nigerian country code and support every African dialing code. SMS codes expire in 60 seconds with a visible countdown and clear error states.

- **SECURE**
  SMS over verified aggregators.
- **SIMPLE**
  One tap to receive the code.
- **CLEAR**
  Inline error states, no modals.

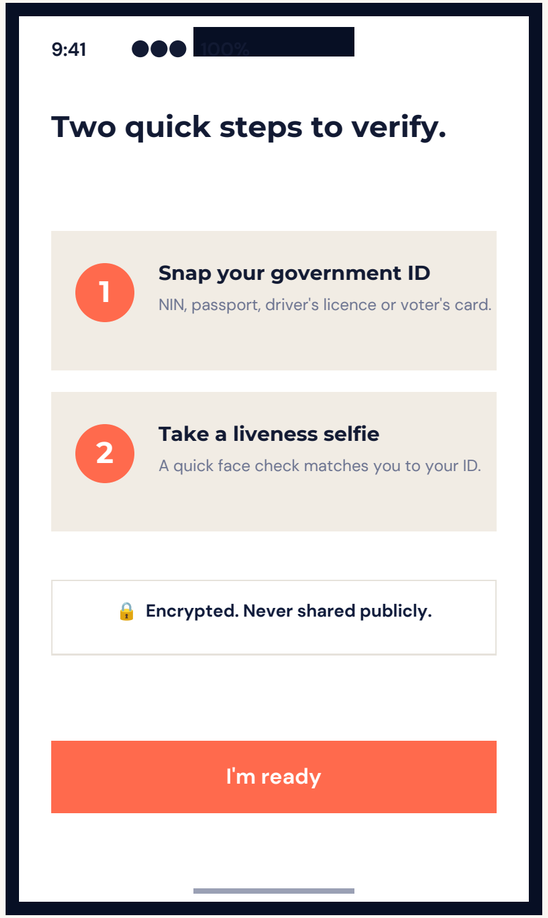

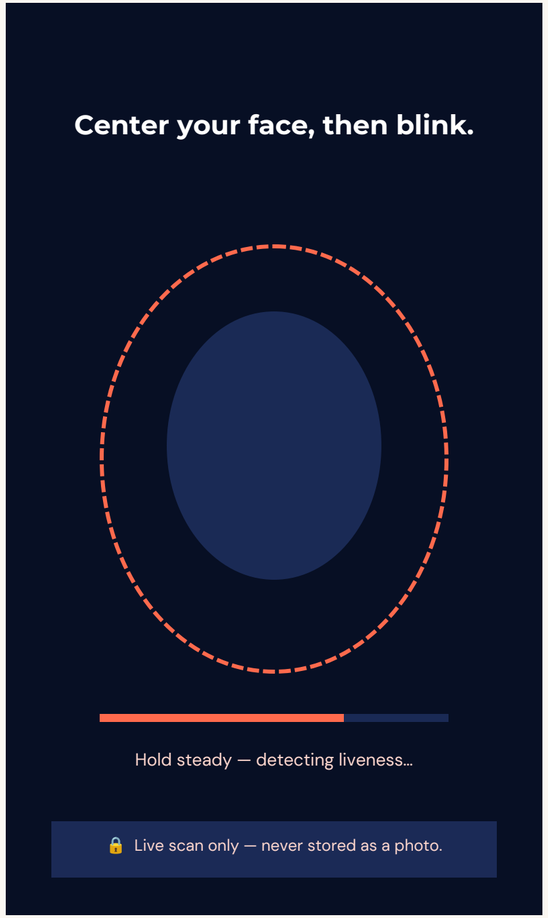

SECURITY
Verification is the product's promise. Simple inputs, inline validation, and a visible countdown reduce support load.

05 · GOVERNMENT ID

Government-backed identity + liveness.

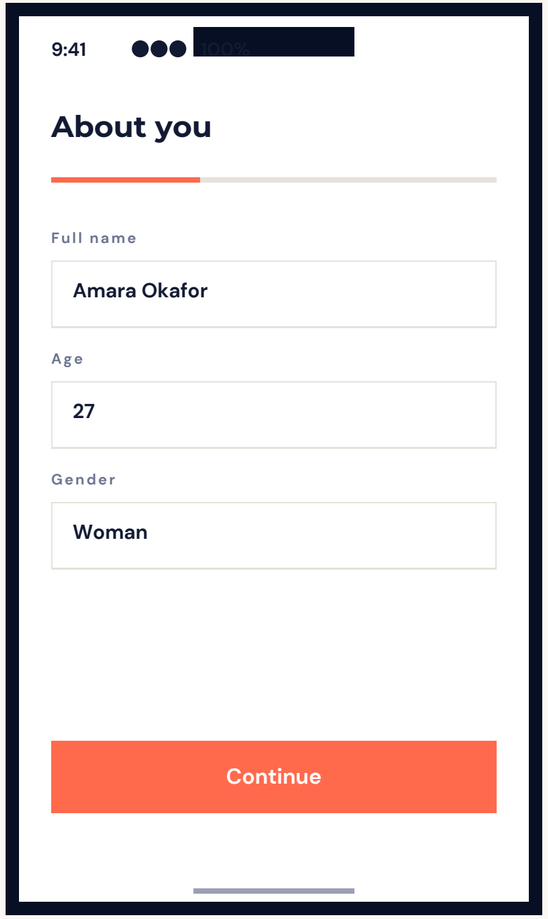

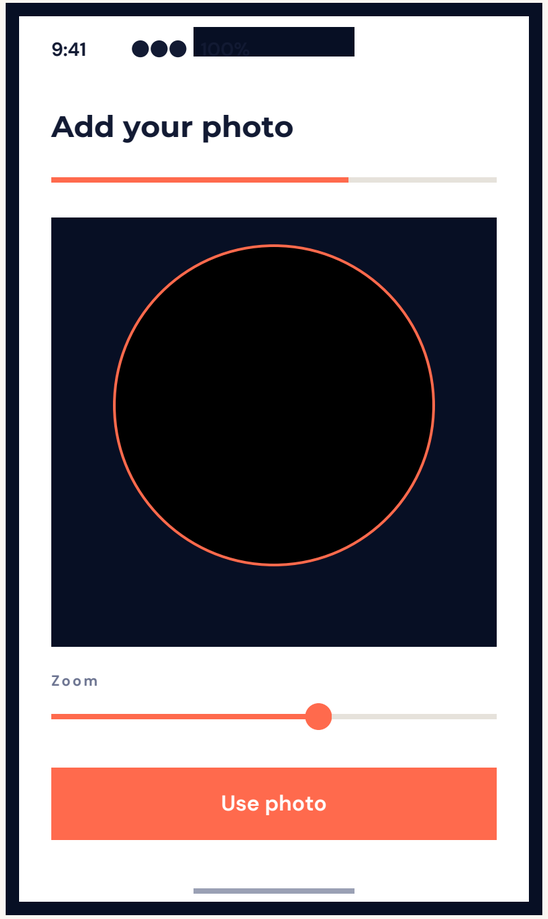

PRIVACY-CONSCIOUS

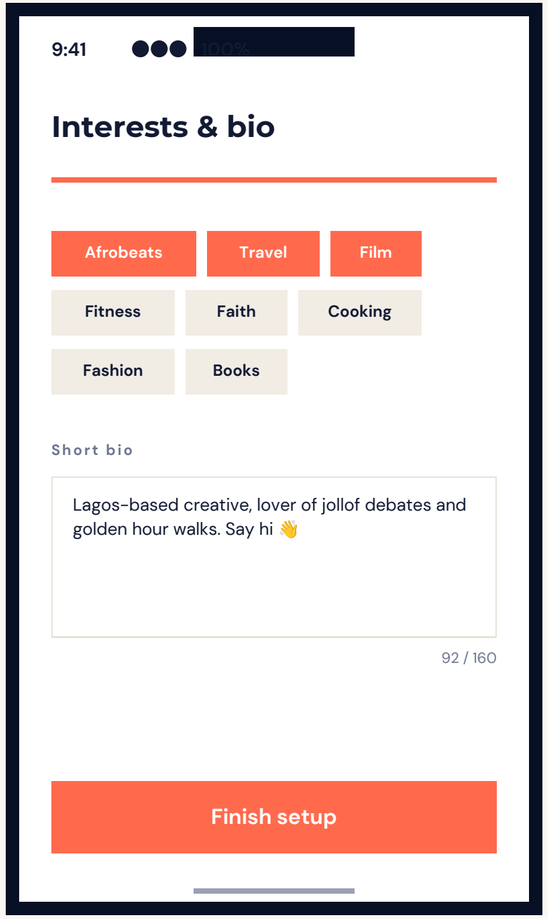

Each step is one task with a visible reason. Live scan replaces stored imagery; copy builds confidence throughout.

06 · PROFILE

Setup — basics, photo, interests.

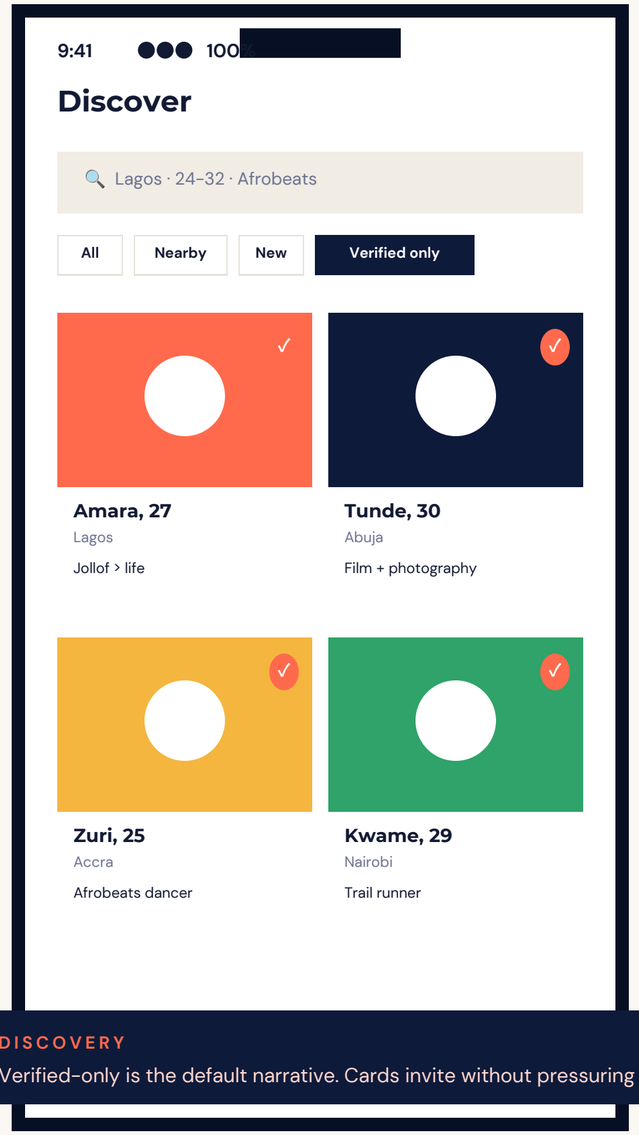

FRIENDLY SETUP

Three screens, three jobs. Realistic placeholders model expected tone and reduce blank-field anxiety.

07 · DISCOVER

Home feed — verified-only.

Status bar
Time + system icons stay out of the way.

Smart filters
Location, age range, interests — all persistent.

Verified-only toggle
A one-tap safety mode, surfaced as a chip.

Card system
Rounded cards, coral avatar band, verification mark top-right.

Bottom navigation
Four tabs: Home, Chat, Wallet, Profile.

100%
Verified profiles only

Contrast across UI

DISCOVERY

Verified-only is the default narrative. Cards invite without pressuring — no swipe streaks, no scarcity cues.

08 · PROFILE CARD

Verified profile — Tunde Adeyemi.

Verified badge, inline

A coral check sits on the avatar and the name block.

Respectful safety

Report and block live in a discreet overflow menu, not a shouting button.

Signals of trust

Community rating + verified ID + mutual interests do the social proof work.

Primary intent first

Message is the clear primary action; Add friend sits beside it.

Overflow actions

- Share profile
- Block user
- Report a problem
- Hide suggestions

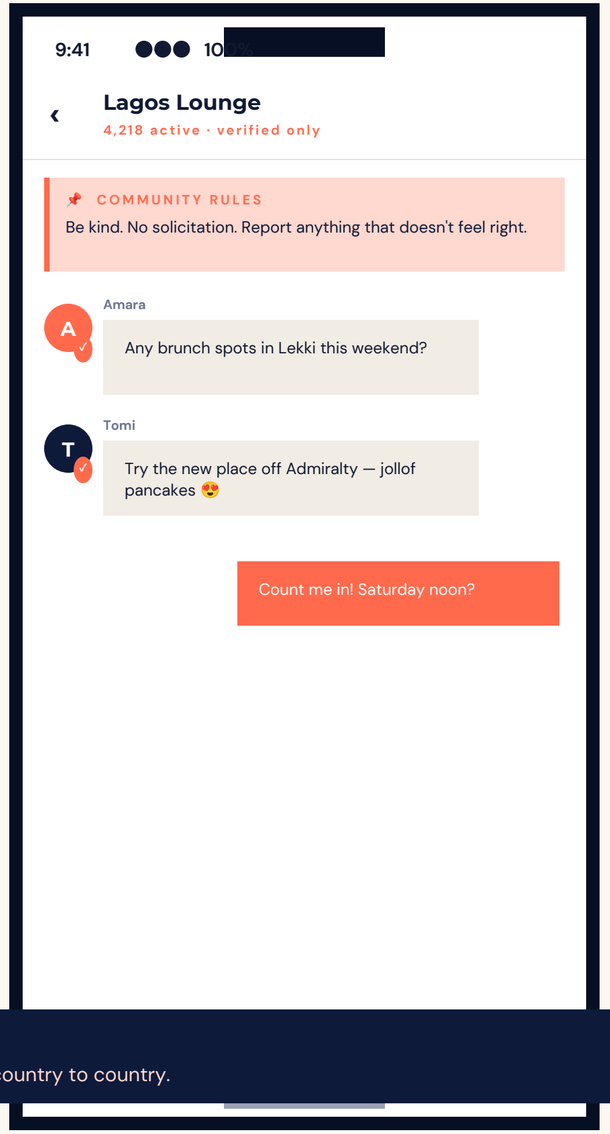

RESPECT BY DEFAULT

Verification sits where decisions are made. Safety is present but not loud; the primary action is to connect.

09 · COMMUNITY

Nigeria country rooms.

Country-first grouping

Nigeria rooms live under one country tab — easy to switch to Ghana, Kenya, SA.

Pinned rules at the top

Community guidelines are always one glance away, not buried in a settings page.

Verified avatars only

Every bubble carries the coral check. Moderation is easier when everyone is real.

Active signal

Green dots and live counts replace noisy notifications.

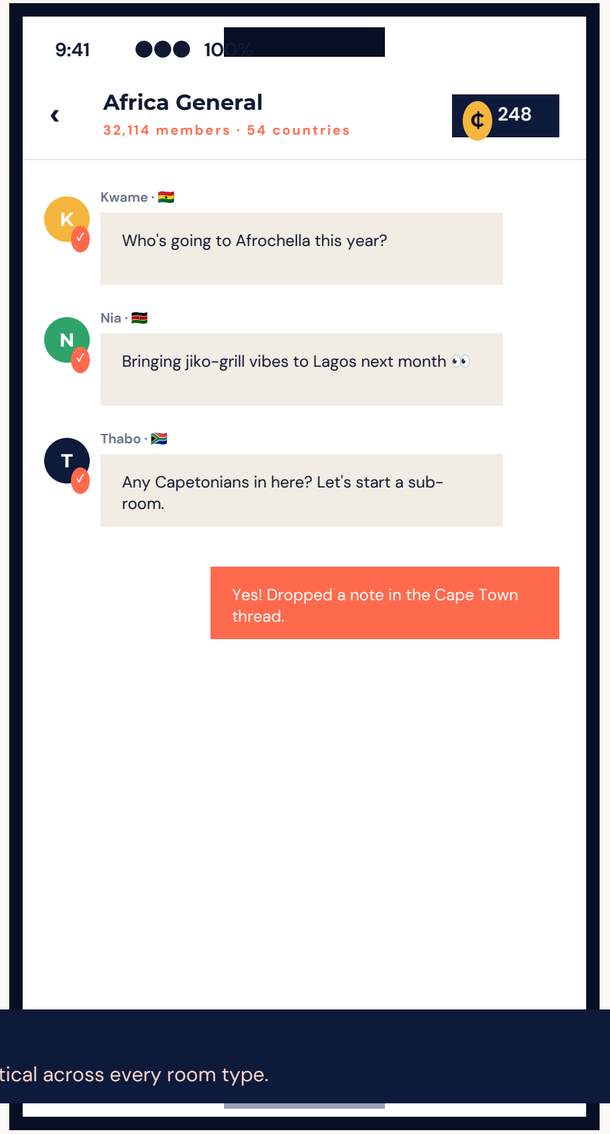

COMMUNITY MODERATION

Pinned rules + verified avatars shift moderation left. Clear navigation lets users jump country to country.

10 · ROOMS

Age-based rooms + Africa General.

ONE CONTINENT · MANY ROOMS

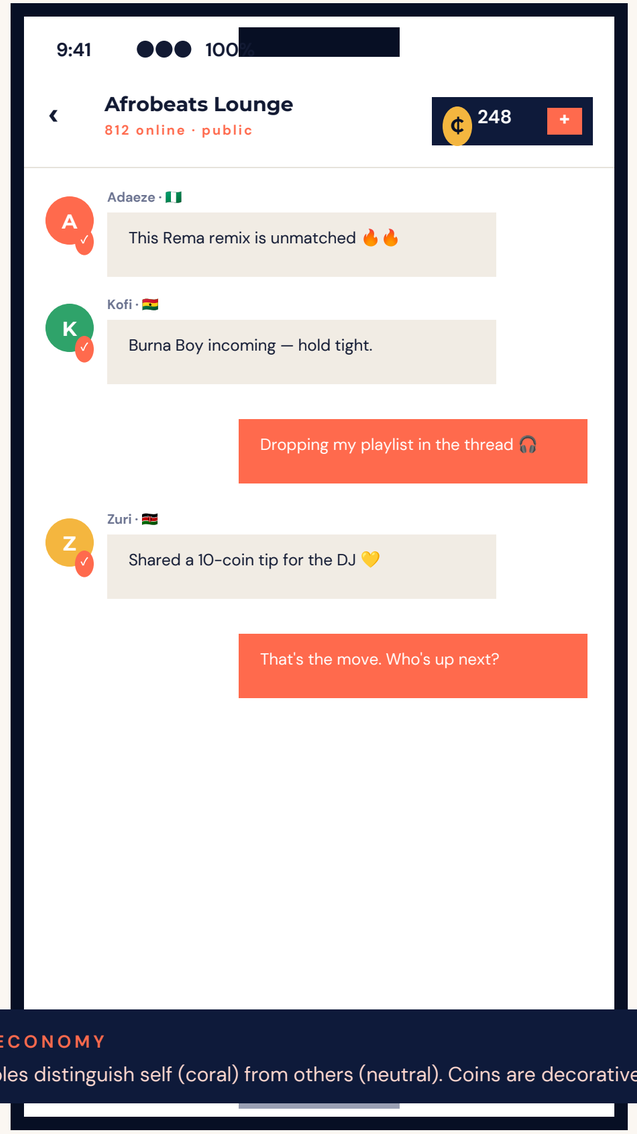

Age-based rooms sit next to country rooms and one big Africa General.

4	54	1
Age tiers	Country rooms	Continental hub

INCLUSIVE BY DESIGN

Rooms respect age tiers, nationalities, and a shared continental identity. UI stays identical across every room type.

Group chat with coin economy.

₵

Coins power expression, not access.

Members tip creators, send gifts in rooms, and unlock cosmetic features. Core matching, chat, and safety remain free.

₵ 100	₵ 500	₵ 1,500
₦ 950	₦ 4,200	₦ 11,000

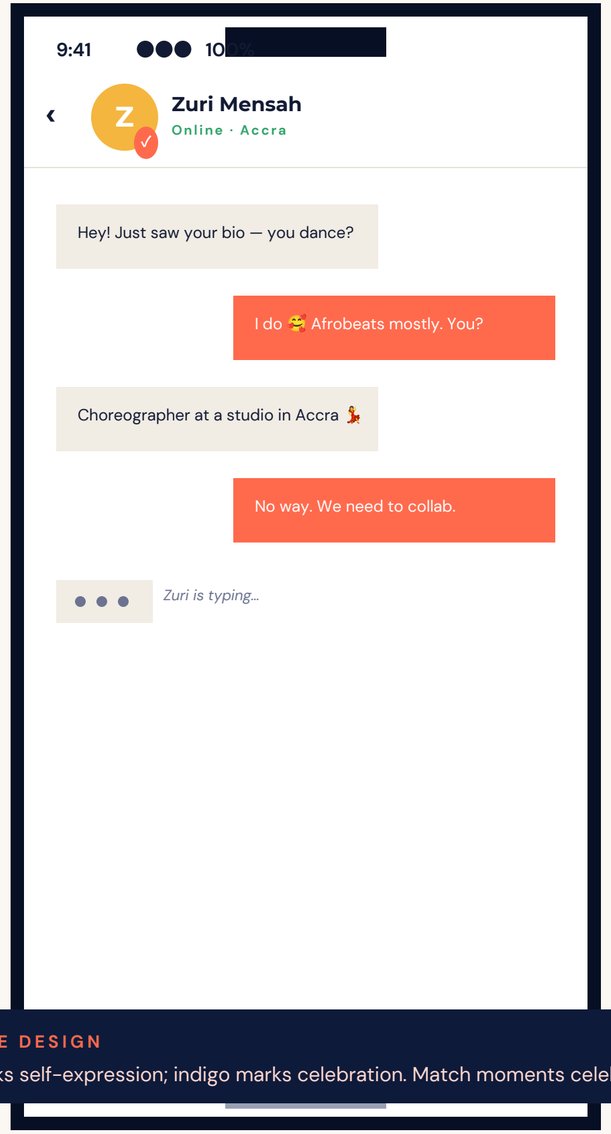

Buy coins

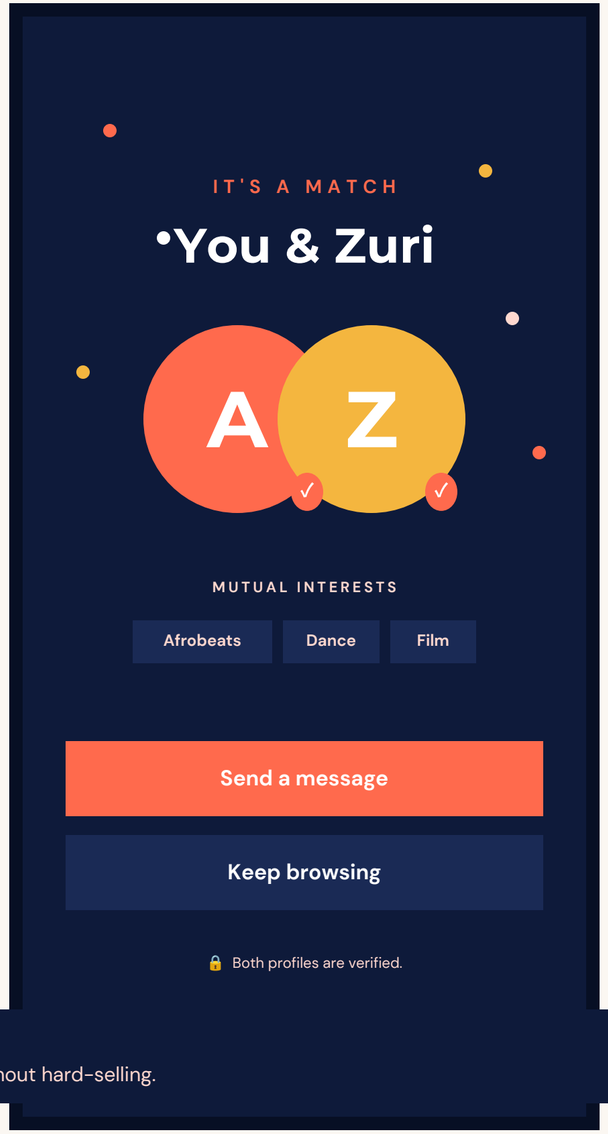

CHAT + ECONOMY

Chat bubbles distinguish self (coral) from others (neutral). Coins are decorative, never a paywall for safety.

12 · 1 : 1

Private chat & new match.

— Intimate, uncluttered

Private DMs drop the room chrome. Just the two of you.

— Typing indicator

Three dots + name reduce guesswork and anxiety.

— Positive match moment

Confetti, matching badges, instant action — never a dead-end screen.

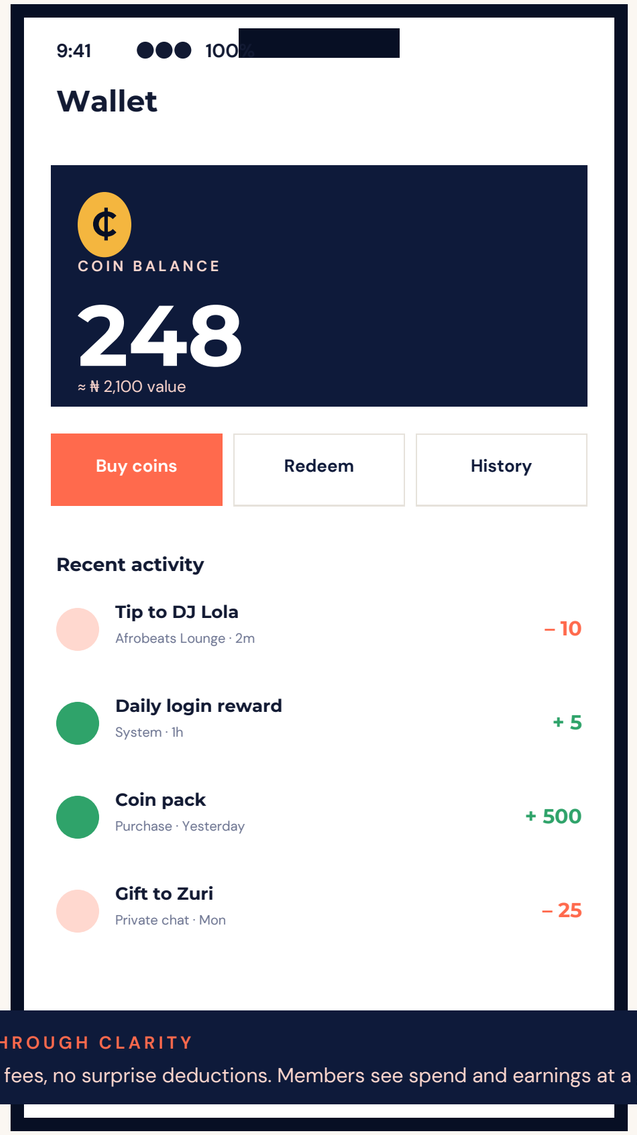

— Clear second choice

'Keep browsing' is equal in weight so a match never feels like pressure.

INTIMATE DESIGN

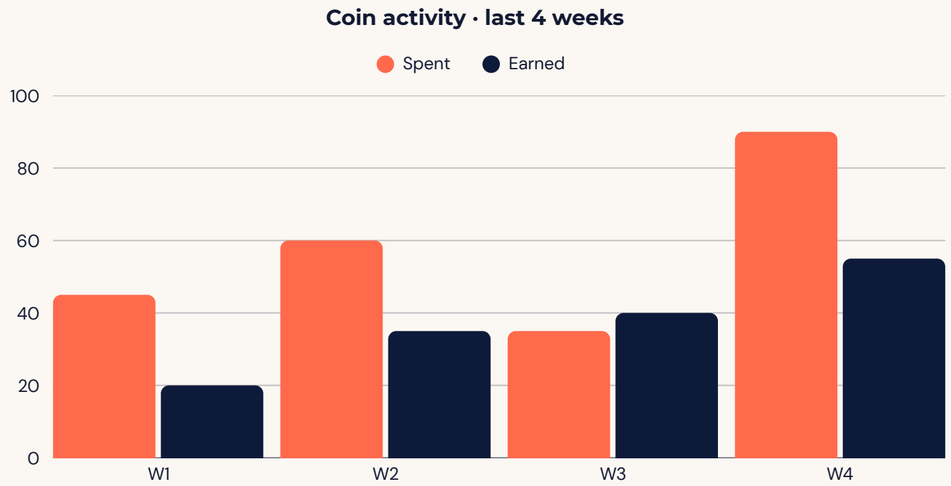

Coral marks self-expression; indigo marks celebration. Match moments celebrate without hard-selling.

Coins, transactions, offers.

Transparent spend, always.

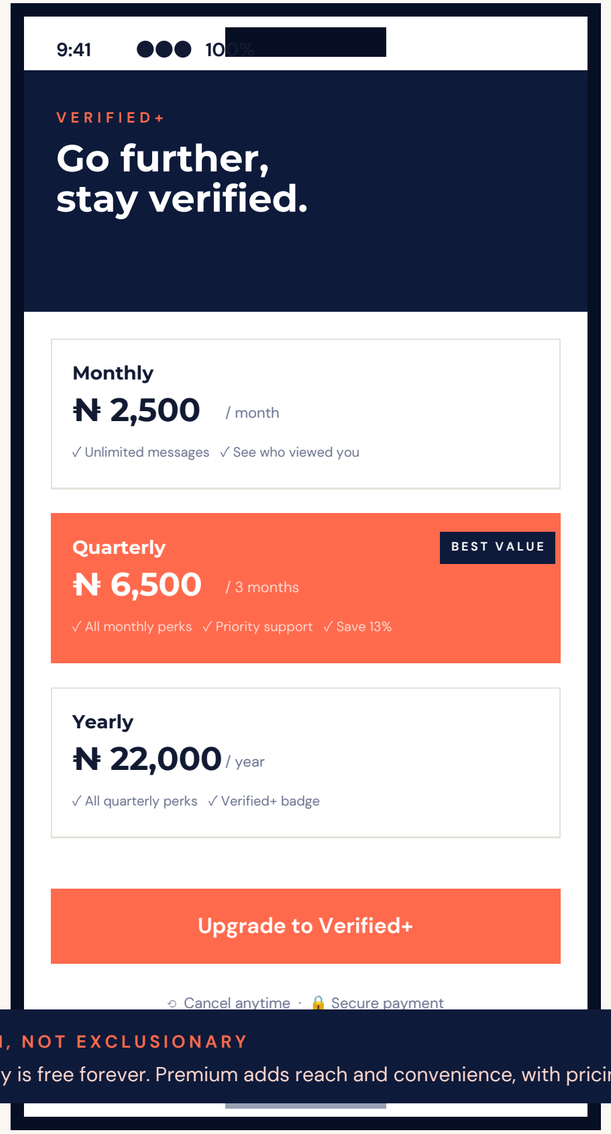

Every coin event is logged with context: who, where, when. Members can redeem for discounts with partner brands or hold them for in-app expression.

TRUST THROUGH CLARITY

No hidden fees, no surprise deductions. Members see spend and earnings at a glance — trust is cheaper than lifetime value.

Upgrade, affordably.

Unlimited messaging

Match, DM, and chat with no daily caps.

See profile views

Know who's interested — mutually.

Priority discover

Appear earlier in verified feeds.

Verified+ badge

An elevated mark for long-term members.

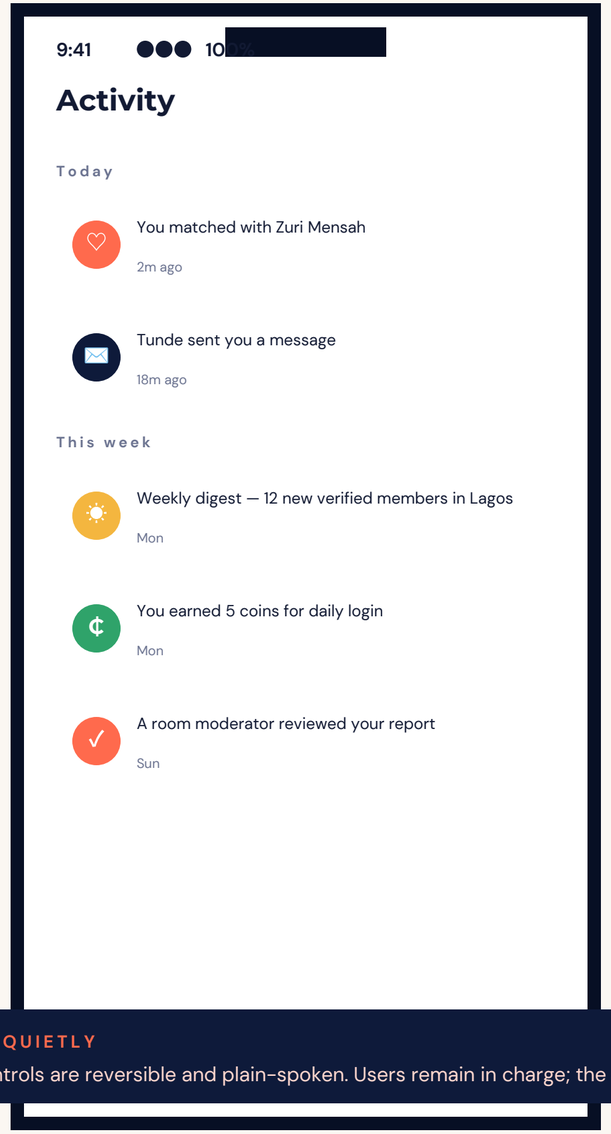

“Finally a social app where I don't have to screenshot before replying. It just feels... safer.”

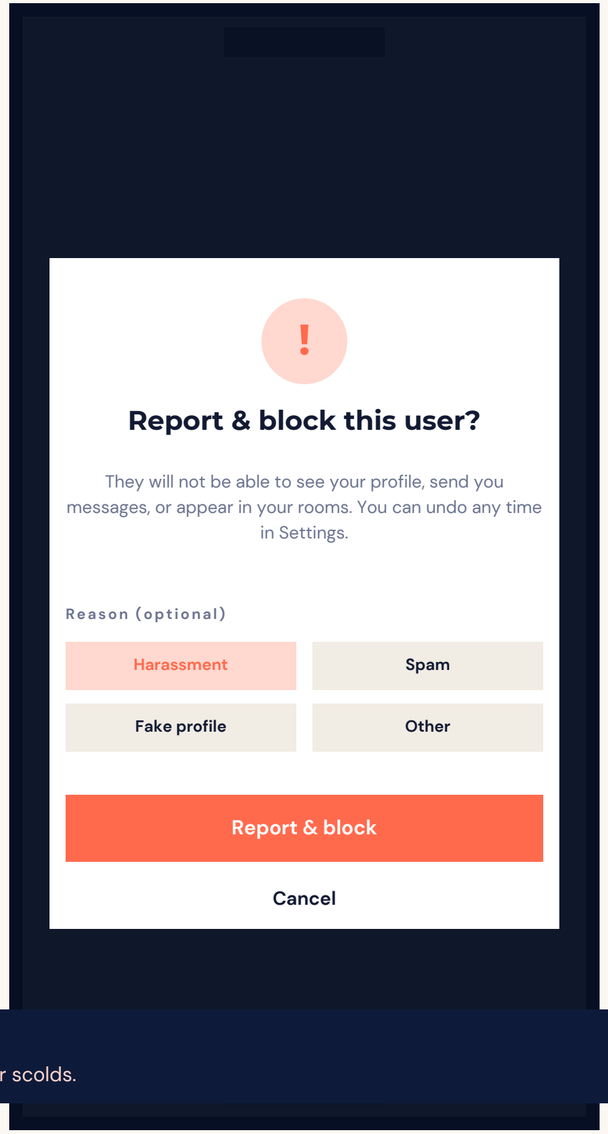

— Amara O. · Verified+ since 2026

PREMIUM, NOT EXCLUSIONARY

Core safety is free forever. Premium adds reach and convenience, with pricing that respects local wallets.

Notifications + report / block.

Grouped by time

Matches, messages, system, and coin events live together, scoped by day.

Respectful language

No shame, no blame. Explains outcomes plainly before confirmation.

Reversible, not sticky

Blocks are undoable from Settings — safety isn't a trap door.

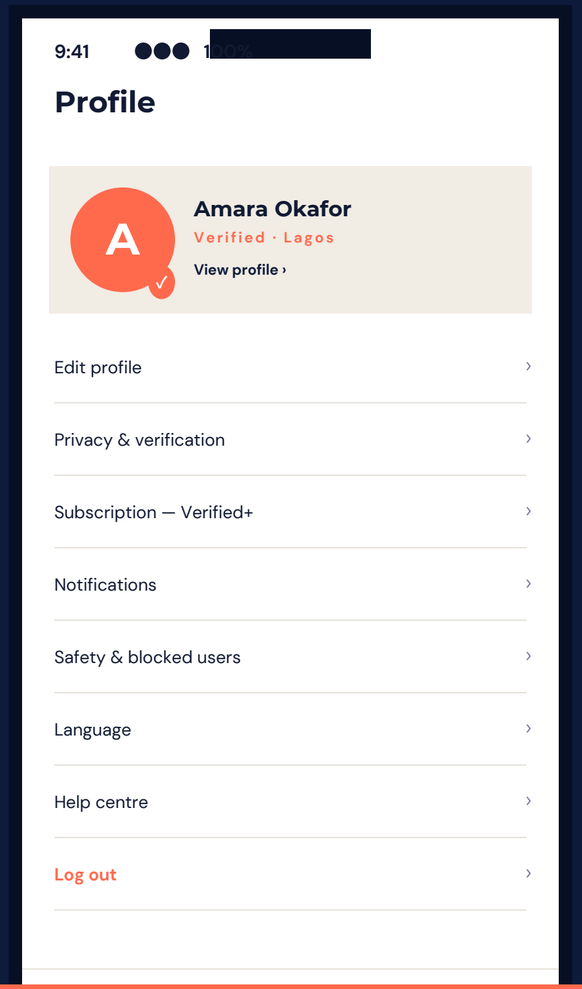

Accessible targets

48 px minimum tap targets, high-contrast type, clear focus states.

SAFETY, QUIETLY

Safety controls are reversible and plain-spoken. Users remain in charge; the app never scolds.

Settings and the end-to-end flow.

END-TO-END FLOW

Verification is the gate, every room is the reward.
